October 15th, 2024 (Concord Twp., Ohio)–The grand opening of Johnny's Auto Spa + Detail in Concord Township, Ohio, today marks an exciting new venture for local entrepreneurs John & Keri Nekic and Brandon & Heather Dynes. This state-of-the-art 6,300 square-foot facility, located at 7879 Old Crile Road, promises to redefine car care in the area. Highlighted by its 145-foot-long car wash conveyor tunnel, the establishment also features a comprehensive detail center with four full-service bays, ensuring meticulous care for every vehicle. Customers can take advantage of the ten free vacuums available on-site, enhancing the convenience and quality of the service. Inside, a welcoming lobby offers comfort while offices and amenities support the needs of the dedicated staff. The launch event not only celebrated the opening of a new business but also underscored the community spirit and innovation driving Concord Township's local economy forward.

The state-of-the-art car wash facility is designed to deliver high-quality service with efficiency and precision. With the ability to wash over 120 cars per hour, the 145-foot tunnel is a marvel of modern engineering, providing ample space for extended drying time, ensuring vehicles leave spotless and gleaming. The power of ten 15-horsepower blowers generates winds of up to 150 mph, efficiently moving 4,400 cubic feet of air per minute to dry each car thoroughly. To complement this, the facility's overhead NEOGLIDE® soft cloth material offers superior cleaning by maintaining optimal contact, which not only enhances the car's shine but also rejuvenates the paint, leaving vehicles looking as good as new. This combination of advanced technology and thoughtful design makes Johnny's Auto Spa + Detail the go-to destination for car owners seeking top-notch cleaning services.

Additionally, Johnny's Auto Spa + Detail is revolutionizing vehicle care by incorporating the latest advancements in car wash protectants, with a particular focus on Graphene, hailed as the "Next Evolution" in Ceramic Protectants. Graphene not only offers the highest gloss and hardest protective shell available but also enhances the durability of your vehicle's finish. Similar to traditional Ceramic products, Graphene contains hydrophobic properties that cause rain to bead up and effortlessly shed off the vehicle's surface. This feature significantly improves visibility during rain and re-

duces spotting once the vehicle is dry. By choosing Johnny's Auto Spa + Detail, customers are ensuring their car receives superior protection and a stunning finish, all while enjoying the convenience of an automatic car wash.

As conscientious stewards of the environment, Johnny's is committed to sustainable practices, particularly in our water reclamation and energy usage. Our advanced systems allow us to reclaim 40% of our water, which is then meticulously filtered and deodorized with O3 ozone, ensuring it is both clean and eco-friendly. For a spot-free rinse, we utilize fresh reverse osmosis water, which further enhances our environmentally responsible approach. Additionally, our use of Variable Frequency Drives (VFD) plays a crucial role in minimizing our electric consumption, thus significantly reducing our carbon footprint. Importantly, all the chemicals we use are biodegradable and environmentally friendly, aligning with our dedication to environmental sustainability.

John Nekic, Owner, expressed his excitement, stating, "Today is such an exciting day to see a long-time dream of building a truly exemplary car wash and detail center come to fruition. I am thrilled to provide these services to our community. Our flagship Johnny's Auto Spa + Detail is anchored in quality and commitment to the community we serve." Brandon Dynes, Owner, added, "We are not only eager to provide top-notch services but also to contribute to the local economy by creating new jobs. Our flagship center promises to be a beacon of innovation and community engagement."

Johnny's Auto Spa + Detail announces its grand opening with an exclusive offer: a 50% discount on the first month of our VIP membership club. This membership not only saves customers money but also grants them access to our VIP Fastlane, ensuring a swift and seamless experience. Customers may be surprised with a free wash if they are the lucky 100th vehicle! The stunning facility, brought to life by Marous Brothers Construction's Design-Build Group, reflects their renowned commitment to quality, integrity, and exceptional craftsmanship. To get a glimpse of the remarkable design and state-of-the-art amenities, visit our website to view photos of the project.
